# An Overview of U.S. Fresh Produce Trade 

## Steven Zahniser USDA Economic Research Service

## Presentation to "Immigration and Farm Labor" Conference <br> University of California, Davis, March 17, 2023

The author thanks Brian Adam, Felix Baquedano, Jennifer Bond, Wilma Davis, Gary Lucier, and Catharine Weber for their feedback and comments.

The findings and conclusions of this presentation are those of the author and should not be interpreted as representing any determination or official policy of USDA or the United States Government. This research was supported by the intramural research program of the Economic Research Service of the United States Department of Agriculture.

## Why Do Countries Trade?

| Textbook (Saylor Academy, 2012) | Connections to Produce Trade |
| :--- | :--- |
| Differences in technology | Protected agricultural techniques widely available across many countries <br> May result in differences in product attributes and quality |
| Differences in resource endowments | Exporters tend to have climates favorable to growing fruit and vegetables and <br> growing seasons that complement those of importing countries <br> Some climates are more favorable for controlling phytosanitary challenges <br> Water, soil, farm labor |
| Differences in demand | Many destinations for U.S. produce exports are upper-income or fast-growing economies <br> Many suppliers of U.S. produce imports are middle-income countries <br> U.S. = Upper-income, with GDP per capita of \$69K in 2021, compared with \$20K for Mexico* |
| Existence of economies of scale | ??? |
| Existence of government policies | Free trade with regulatory cooperation: <br> USMCA, CAFTA-DR, Peru, Chile, Colombia, Panama, South Korea, to name a few <br> Government supports |
| Not on list | Low transport costs, especially across land borders and by sea |
|  | *Purchasing power parity, 2017 prices |

## A Quick Snapshot

## Of U.S. Produce Trade in 2021

$\square$

## U.S. Fresh Produce Trade: A Large Fish in a Much Bigger Pond

## U.S. fresh produce trade, 2021:

- Exports: $\$ 7.1$ billion
- Imports: $\$ 26.0$ billion
- $4.0 \%$ of total U.S. agricultural exports
- $15.2 \%$ of total U.S. agricultural imports
- $0.4 \%$ of total U.S. goods exports
- $0.9 \%$ of total U.S. goods imports
U.S. Agricultural Trade
U.S. dollars by Product Group, 2021

- Other agricultural products
$\square$ Other fruit, vegetables, tree nuts, and the ir products ■ Fresh produce
U.S. Goods Trade
U.S. dollars by Product Group, 2021

- Other agricultural products
- Other fruit, vegetables, tree nuts, and their products
- Fresh produce
- Nonagricultural goods

# How Did U.S. Produce Trade Change During the Past Economic Cycle? 

## The Period 2007-09 to 2019-21 Roughly Covers an Entire Economic Cycle

Source: USDA, Economic Research Service International Macroeconomic Data Set.

# U.S. Fresh Produce Imports Grew Faster Than Corresponding Exports Between 2007-09 and 2019-21 

Compound annual growth rate, 2007-09 to 2019-21, imports versus exports:

Produce trade:

- Nominal value: $7.8 \%$ vs. $2.3 \%$
- Real value (2022 dollars): $6.0 \%$ versus $0.6 \%$
- Mass: 3.9\% versus $0.3 \%$

## Agricultural trade:

- Nominal value: $5.6 \%$ vs. $3.4 \%$

## All goods trade:

- Nominal value: $1.1 \%$ vs. $2.7 \%$

## Conclusions

## A Few Takeaway Points

U.S. fresh produce trade in 2021 encompassed $\$ 7.1$ billion in exports and $\$ 26.0$ billion in imports.

Between 2007-09 to 2019-21:

- U.S. fresh produce exports grew at a compound annual growth rate of 0.6 percent, compared with 6.0 percent for corresponding imports.
- Cherries, sweet potatoes, spinach, and potatoes were the four products whose share of fresh produce exports increased the most.
- Avocados, raspberries, strawberries, and blueberries were the four products whose share of fresh produce imports increased the most.

Increased produce imports made possible higher (and less variable) levels of U.S. consumption across the year
For some crops, increased imports were accompanied by lower levels of U.S. production and a widening of the market seasons when imports occur.

## Thank you
